

AN ACOUSTIC AND COLORFUL BACK TO SCHOOL: ECOLE DES LAURIERS IN PAU (64)

The motricity room of this primary school caused a sensational back to school. The architect, M. DESPRÉ, wanted to create a playful effect and pleasant acoustics.

So, he contacted TEMPO for a custom ceiling whose tiles thickness varies for both the theatrical and acoustic aspects.

He tapped into the wide range of «LA» Maille 3D, our

mesh, to create a camouflage taking the colours of the facades.

Little ones will have fun without hubbub !

Now our products are available with thickness from 50 to 300mm for all your projects. Ask for TEMPO Style!

Design and installation: Architect : Despré / Contractor: Parent Plâtrerie

- Appropriate fasteners

TESTIMONY

« I knew that I was going to work with TEMPO because I know their standard products well. I appreciate the effectiveness of their acoustic panels for an excellent value of money.

I knew they were ready to listen and develop tailor-made products if needed.

With the creation of these tiles of varying thickness and a precise layout, TEMPO allowed me to give substance to my idea »

Manuel DESPRÉ, Architecte DEA-HMONP
