ACOUSTIC COMFORT AND DECORATION

PROJECT OF THE MONTH

NOVEMBER * 2019

ACOUSTIC WAVES IN THE NURSERY ZAC CLICHY BATIGNOLLES - PARIS XVII^e

The spectacular ripples of this 8m x 8m wall, initially planned in stretched fabric, were born during the presentation of our products to architects.

A beautiful illustration of TEMPO Inspiration and a successful project:

TESTIMONY

« A noble element with beautiful materials, the wall was installed at the very end of the construction. We had been practicing this place for many months and as soon as the first 4 rows were put in place, we felt a reduction in resonance.

At the end of the mounting, the room was no longer the same. Moreover, the final acoustic result has been validated by the control offices.

TEMPO products are a nice discovery for us and the commercial support was perfect throughout the project, with an ingenious approach to find the technical solutions that made it possible to make this idea a reality.

The hazards of the construction site allowed us to verify that the panels have removable and washable covers, which will be useful in this activity room for toddlers.

The visual and acoustic aspects have won us over. We are very satisfied and so are the end users! »

M. BHATTI,
Project Manager for Léon GROSSE
<https://www.leongrosse.fr>

Design and installation:

Main Architects : Querkraft,
Architect co-contractor: Sam Architecture ;
General contractor: Léon Grosse ;
Contractor : : Les Plâtres Modernes Claude Jobin

TECHNICAL FACTS

- TEMPO set of panels 390 x 390 x 50, «LA» Maille 3D Neige 230, Naturel 001, Orange 221 and Rouge 031
- Specific installation technique, deriving from our screw/velcro to wall
