## CONCERTS AT THE «CUBE» : THE ACOUSTIC RECONVERSION OF A SUPERMARKET

### 170 PANELS FOR TOP QUALITY ACOUSTICS

Located in St Gaudens (South France), this 2000 m2 retail space was recently bought by the local authority

The Mayor's Council wanted to use this former commercial space to organize events. So a serious work for quality acoustics had been carried out.

It was about installing 170 panels to neutralize the large volume and the very noisy tiling.

The works allow to receive in «Le Cube» various events: shows up to 1300 people seated/3000 people standing, meals, lounges (Wedding, Antiques...), the Christmas market, sports competitions....

The quality of the new sound environment, considered «much better» by the public, has been checked and validated by an acoustician.

#### Design and installation:

Design : Technical Services Department- City of St Gaudens

Contractor : Platrierie Morales

### TESTIMONY

«We had little experience with this type of equipment and it was a big site with a lot of panels. The TEMPO brand was advocated to us by our material distributor who is familiar with these products.

From installation instructions to the advice of the sales representative on site, we were reassured from the very first panels: it's all a matter of fastening hardware, installation is really easy!

Manufacturing and delivery times have been checked. Everything could have been settled between two concerts.»
